

GHA BOM Procurement

On many occasions we are asked, how can we see what we need to buy for a particular product?

Select	Level	Part	Part Number	Description	Qty Req'd	Reqs	Part Class	Type	Qty on Hand	On Hand	Inspection Qty	Est Price	Supplier	Contract	Item Unit of Measure	Suggested Qty	Unit Price
	1	20	Lower level 1	Lower level 1	4.00	30.00	0	Purchased	10.00	0.00	0.00	320.00	WescoParted Europe	GBP	4.0000	48.00

With the capabilities of Epicor ERP10, this is easily achieved via a dashboard showing the Bill of Materials with the accompanying On-Hand and On-Order details.

GHA in striving to offer our customers solutions have responded to this and enhanced further, our BOM Procurement enhancement gives you that dashboard view, along with the functionality to generate all the required Purchase Orders. Simply enter the quantity you wish to build and select 'Explode', the screen will show how many are

required of each part, how many you have On-Hand, and any you currently have on order. It will then suggest the quantities you need to purchase. From the dashboard you can amend/change quantities, Suppliers and Prices if required, you can enter any required due dates and then select 'Buy'.

The system will then create all the purchase orders for all the selected items using standard Epicor logic.

Note: Only one approved revision is allowed.
