

MIMS

Our Mobile Inventory Management Solution (MIMS) is designed to work the way you do on day to day commercially available mobile devices.

Working with the core inventory module without the need for Epicor's Advanced Material module, fully integrated designed to improve the way your shop floor people interact with Epicor.

Stock Take

Our Simple Stock Take solution with its enhanced approval functionality and greater KPI' reporting provides users with enhanced controls of reporting and stock accuracy.

Part & Bin Tracker

Part and Bin tracker allows you to quickly and easily see details of the scanned or selected part or bin.

MIMS

Issue Misc Material

Not to be confused with Epicor ERP's standard offering, MIMS has functionality capable of adding and issuing material to a job, a single transaction to issue material from multiple locations.

Job Picking

Our Job Picking solution gives the users the capability to pick the whole job, or pick by sub assembly, or pick by operation.

Move Material

Move material functionality is designed to simplify the stock movement process allowing the user to move a single part, several parts or the entire contents of the bin in one go.

From one scan, any of the following can be selected

- Warehouse • Warehouse and Bin • Part
- Part and Lot Number • Part & Serial Number
- Part, Lot & Serial Number • Serial Number
