

# Mobile Field Service App

In today's modern mobile environment, it's imperative successful ERP systems rise to the challenge.

To complement and enhance Epicor ERP service management functionality, **GHA SOLUTIONS** has developed a **MOBILE FIELD SERVICE APP** designed around the user experience.

Focused on the service technician requirements and using readily available inexpensive

technology such as off-the-shelf tablets, the app has functions that allow calls to be received, site travel time and mileage to be recorded and provides directions and contact details all via touch screen buttons.

## Mobile Field Service App

- Provides the functionality and information your operatives need to start, complete and record activities, telling the customer what they have done, how long it took and what materials they have used.
- Provides task and material breakdowns.
- Book billable and non-billable labour or materials, adds ad-hoc expenses and schedules material and labour costs automatically consumed on the service call.
- Builds costs and provides breakdowns, making invoicing easier and improving your cash flow. Allows the operator to get sign off with real time updates for company invoicing. No need to wait for weekly timesheets.
- All the functionality in an easy to read, easy to navigate and easy to understand format for operatives.
